## ChatBots

FAQ - create a Q&A bot in just a few hours

AIML - small-talk

Intent - train a custom intent detection and entity extraction

### From basic to advanced bots:

How can I help you?

What payment methods can I use?

You can pay via PayPal, credit card and online bank transfer.

**Basic**

#### FAQ

The FAQ Bot finds the best answer to the frequently asked questions from a website or a custom defined Q&A file. The data can be crawled from the FAQ-page of a website. This bot is production-ready in just a few hours!

Hey, how are you?

I'm fine, how about you?

Couldn't be better. Is there anything I can do for you?

Yes, tell me about yourself.

In my past live I was a parrot.

**Intermediate**

#### AIML

AIML (Artificial Intelligence Markup Language) helps to catch greetings and small-talk phrases and acts as a "backup" when no good answer is found in the FAQs. This module is a benefit for nearly every chatbot. Additionally, short guided dialogues can be designed in AIML.

I'm looking for a dress.

For which occasion?

My sisters birthday dinner. With a nice flower pattern maybe.

How about this one?

**Advanced**

#### Intent

Intent detection and entity extraction is applied when the user should be able to ask specific, non-static queries. Custom intents and entities can be defined and are learned by the system. Whenever the user enters a query, the probabilities for the intents and entities are analyzed and a suitable answer is created.

# Invoice Processing

## Extracting custom structured information from images or pdf-documents.

- Recognize information such as invoice lines, due dates, and bank account numbers.
- Check plausibility
- Trigger actions

```

    "document_type": "Honorarnote",
    "arzt": "Alexander Huber",
    "leistung": [
      "Folgeordination"
    ],
    "diagnose": "Infektneigung",
    "patient": "Elisabeth Müller",
    "versicherungsnummer": "1234 300970",
    "rechnungsnummer": "165218",
    "rechnungsbetrag": "75,00€",
    "rechnungsdatum": "27.11.2018",
  }
}
```

Bring the attention of the readers back from Youtube, Fortnite and the like to the events of the world.

Due to unmanageable amount of information, active news consumption loses relevance.
